

BICSI's Information Transport Systems Cabling Installation Program

IN100: BICSI ITS Installer 1 3/16-20/09, 7/20-24/09, 11/16-20/09

The **Installer, Level 1** is designed for individuals with little or no experience in voice, data, video or telecommunications cabling installation. There is a written examination followed by a hands-on performance examination. After passing the exam Level 1 installers begin a structured on-the-job Training program using BICSI OJT guidelines. Level 1 registration is valid for two years and is Renewable.

IN225: BICSI ITS Installer 2, Copper Training 4/20-24/09, 8/17-21/09, 12/14-18/09

Keep up with innovations, trends and emerging technologies in copper cabling installation. This 5-day course sets the foundation of a copper-based structured cabling system installation. The course begins with an overview of copper transmission principles, professionalism, life safety and general industry best practices, as related to copper. A significant amount of course time will then be spent on BICSI best practices for the installation, termination, testing and retrofitting of copper cable. Additional topics covered will include BICSI best practices for pathways and spaces; grounding, bonding and protection; and firestopping.

IN250: BICSI ITS Installer 2, Optical Fiber Training 5/18-22/09, 9/14-18/09

Gain the skills necessary to handle the cabling systems of today and tomorrow. IN250 is a 5-day course setting the groundwork for optical fiber-based structured cabling system installation. The course will open with an overview of fiber transmission principles, professionalism, life safety and industry best practices, as related to fiber. A significant amount of course time will then be spent on installation, splicing, termination, testing and retrofitting of optical fiber cable. Additional topics covered will include pathways and spaces, firestopping and an introduction to field coordination.

TE350: BICSI ITS Technician Training 2/16-20/09, 6/15-19/09, 10/19-23/09

Join an elite group of installers who possess this high level of skills training.

Take your installation performance to the next level through the study of specialized systems and advanced copper and optical fiber structured cabling systems. TE350 is an intensive 5-day course that provides the necessary skill set of a structured cabling systems technician. An advanced study of copper splicing, testing and troubleshooting will open this course. A significant amount of course time will then be spent on the splicing, testing and troubleshooting of optical fiber cable. The third major topic covered in this class will be field coordination, including site surveys, blueprint reading, network infrastructure and project management. This course will also cover some special topics within ITS cabling installation.

Prior application and approval is required to attend class or sit for exams. Please contact Diversified for details. See reverse side for enrollment form.

BICSI's Information Transport Systems Cabling Installation classes and exams are offered at Diversified Group's Wire & Cable Division located in Sterling Heights, Michigan. Class offerings are as follows:

Installer 1 (No experience required) 3/16-20/09, 7/20-24/09, 11/16-20/09
Installer 2, Copper (1 yr. exp)... 4/20-24/09, 8/17-21/09, 12/14-18/09
Installer 2, Optical Fiber (2 yrs exp)... 5/18-22/09, 9/14-19/09
Technician (3+ yrs exp, plus both Level 2 exams).... 2/16-20/09, 6/15-19/09,
10/19-23/09

Prior application / approval are required for both classes and exams. Enrollment is limited to 8 students per class. Classes fill up quickly so reserve your seat today. **Phone 866-392-9473 or 586-264-6500**
